

Industrial Components

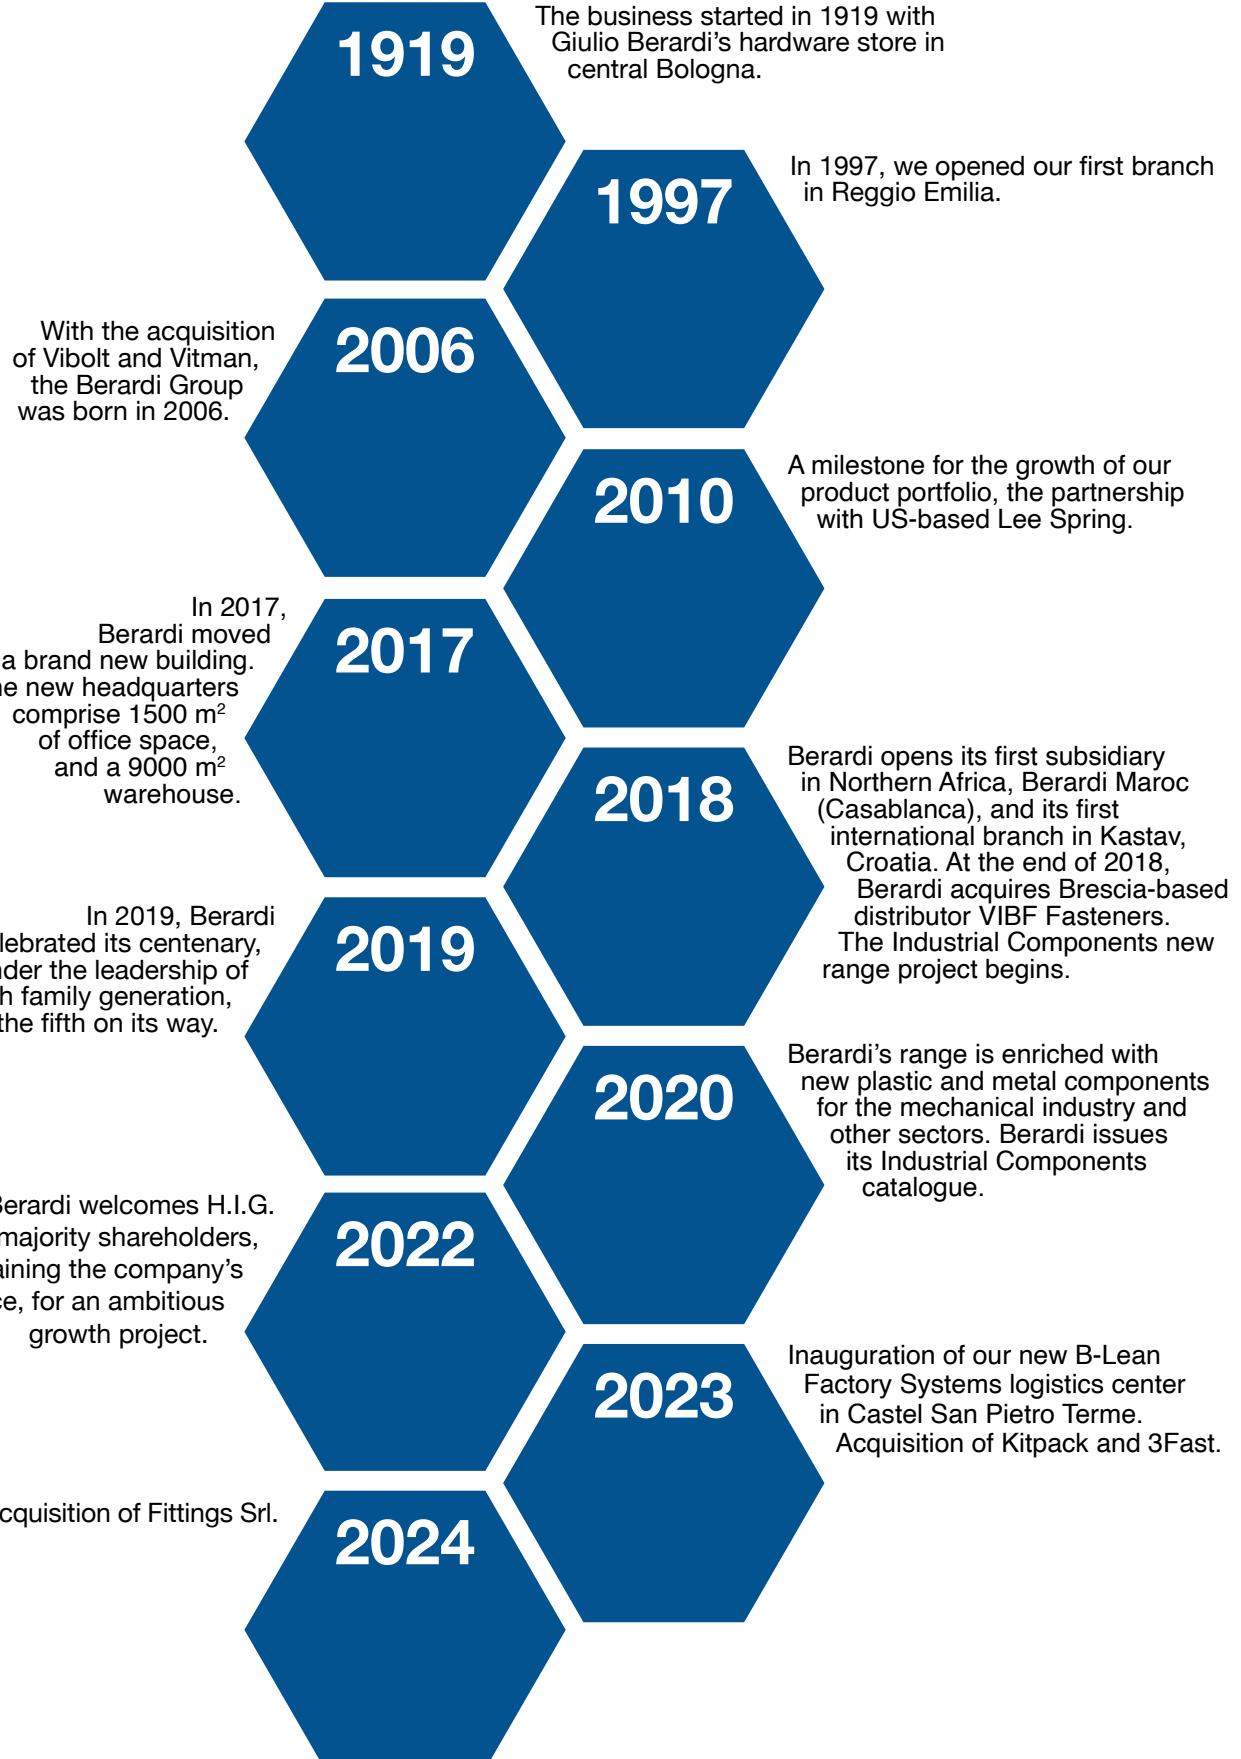

2024

OUR VISION

ommitment, passion, and professionalism from all of us so our customer can “forget” about the management of the class C parts. Our goal is to become a point of reference, well known in the market, and able to innovate to anticipate what is needed. Determination to look beyond what defines us, generation after generation.

Innovation, research and development since 1919

Giovanni Berardi
president

FROM SUPPLIERS TO PARTNERS

Our Mission is to support clients in breaking down the overall cost of supply and we achieve this by suggesting and sharing technical solutions, developing innovative services that cut management costs and offering an ever wider range of products allowing clients to reduce the number of suppliers.

We are also constantly creating new job opportunities and ensuring suitable and comfortable working conditions that enhance the peculiarities of each employee and bring personal satisfaction. This behaviour encourages full cooperation and effective constant commitment.

QUALITY WITHOUT COMPROMISE

"Quality without compromise" is not just a slogan but a strong belief the company has held since it was founded. The starting point for minimizing the risk of product defects definitely lies within the careful selection of the supply sources made through an audit carried out by qualified staff and a deep knowledge of the suppliers. Alongside this, we can also tag a laboratory that is among the best equipped in our field. As a result of our customer requirements and the development of innovative technologies, it is constantly improved with new instruments and specific staff training. Quality system certification is another sign of the constant care taken to improve the product and the services offered. State of the art equipment includes the traction machine, the salt spray chamber, the micro hardness machine set, the magnatest, the digital system of optical measuring and sorting machines with optical and laser devices to satisfy customers who require defectiveness expressed in parts per million (ppm).

SPECIAL CUSTOM PARTS

The consistent partnerships that we have developed over the years with our suppliers allow us to meet the various demands for special custom parts, competitively and with quality. We can therefore meet requests for hot moulded parts (for medium-large sizes and small series) or cold moulded parts (when quantities are more substantial), using the most economic machines for simple items and multi-station machines when the structure of the parts becomes really complex. We are equally competitive in the supply of parts requiring chip removal (turned parts). We can choose traditional cam machines to reduce manufacturing costs for simple parts, or more sophisticated and complete CNC machinery when the shape and precision of the parts is paramount. We have convenient solutions even for large batches using special multi-spindle lathes. In protective coatings and materials, our experience now includes all of the most common types used on the market.

LOGISTICS BUILT AROUND THE CUSTOMER

In a framework in which rapid responses to market needs are becoming increasingly important, an efficient logistics organization is essential in order to meet market expectations. Berardi's distribution system is made up of a modern head office, located in Castel Guelfo, with centralized main services (Personnel, Administration, Technical, Purchasing, Logistics and Quality), and a network of peripheral warehouses, widely covering the domestic territory, with stock sized on the need of local customers. The business structure focuses on offering the best efficiency in terms of service and also technical support. This system, which is perfectly replicated in all the warehouses, boasts high flexibility and computerization and ensures a rigorous traceability of the batches and, for most of the items, also their origin. We are thus able to quickly meet the specific needs of customers in terms of customised labelling, electronic exchange/real-time information sharing and Kanban and Kanban Up service management. Continuous investments in logistics and research and the development of innovative services make us the ideal partner for the management of class C parts. Earning the trust of a growing number of customers encourages us to continue along this path.

KANBAN AND KANBAN UP: TWO EXCLUSIVE SYSTEMS, ONE SINGLE GOAL

Kanban

We offer logistics systems which are extremely adaptable, designed specifically for our customers and reserved for the “Lean” supply of class C items. A dedicated team analyses the procedures and production flows to be improved and uses a collaborative approach to develop the perfect “integrated” logistics solution. The saving achieved and the reduction of problems related to the management of these materials are the basis for the success of our logistics solutions and our best form of advertising. The reliability of hundreds of “Kanban” services and continuous research and development of innovative solutions have made Berardi the ideal partner to achieve the level of competitiveness and flexibility required in today’s market.

Kanban Up

To ensure the simplification of our services, we have improved the integrated logistics offer, introducing a new method of detection and control for logistics facilities: Kanban Up. Thanks to this innovative system, our customers can constantly monitor their logistics facilities through a dedicated web portal, detect missing items, and send orders directly through their smartphone. More operators (process owner) can be enabled to detect deficiencies, thus creating an independent supply of the individual departments while still keeping control over them through the automatic sending of e-mails to the purchasing manager, which contain all the information about the order.

S-BBK smart box

S-BBK 4.0 is a highly technological Smart box equipped with capacitive intelligence and built-in electronics it uses to constantly communicate the quantity of material it contains, thus making it possible to know how much is in Stock at all times and to automate supply activities. When the quantity inside the container is less than or equal to the pre-set Re-order Point, the system automatically generates a refill request, which is sent regularly on the planned fulfilment days.

EasySelf 24

The EasySelf 24 system, from the Industry 4.0 perspective, facilitates the automatic operation of the whole management flow for different items, such as: PPE, tools, accessories, first-aid objects and assorted equipment. It eliminates waste from repetitive activities with low added value, material storage, their handling, and inventory management. In terms of safety, it also automates the PPE use registry and ensures the precise tracking of consumption, monitoring withdrawals and any abnormal uses by individual operators. EasySelf 24 is entirely remotely controlled and sends alarms and signals anomalies without the need to connect to the data network. It manages sending item reorders to the supplier, and produces consumption statistic, optimizing all Supply Chain activities

NEW RANGE OF INDUSTRIAL COMPONENTS

We always keep expanding our product range to consolidate our supplying partnerships.
Our mission is to work with our clients to simplify their C-parts management and reduce the overall costs.
We believe that interfacing with one partner for multiple product categories is a fundamental aspect of an efficient supply chain.
For this reason we have developed a comprehensive range of components for all industrial sectors and applications.
We put in all our commitment, knowledge and experience to meet the needs of our Clients, who are always at the center of our development projects.

COLOUR

G5 Grey RAL 7035
N5 Black RAL 9005

PROTECTION GRADE

IP66
 IP68 - 0,6 bar (60 min)
 IP69

SELF-EXTINGUISHING

UL 94 V-0

AIR PASSAGE

> 400 ml / min / cm² a Δp = 0,07 bar

WATER PASSAGE

≥ 0,83 bar (30 sec)

OPERATING TEMPERATURE

-40°C ÷ 100°C

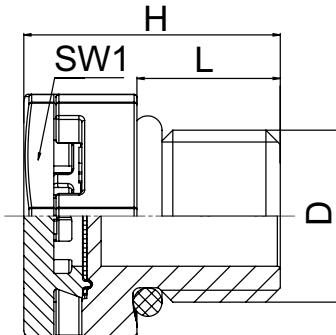

USE

Protection for electro-technical and electronic enclosures against condensation due to temperature and pressure variations.

NOTES

Ventilation and continuous adaptation to the internal pressure.

The venting element does not work if blocked by dust or submerged in water.

STANDARD
DIN 95363/A

MATERIAL - SURFACE TREATMENT

Body: NR (Natural rubber)
Pin: Cl 4.8 (Steel) white galvanized
Washer: DD11 (Steel) white galvanized

COLOUR

NE Black

RUBBER HARDNESS

60 Shore A (± 5)

OPERATING TEMPERATURE

-50°C ÷ 80°C

NOTES

* Indicates the maximum load that can be supported before its functionality is compromised. The load must be compressive - avoid applying traction.

** Indicates the height variation of the rubber under maximum load.

Available in other materials, hardnesses, dimensions, and colours.

	Code NE	D (± 1)	H (± 1)	D1	L (± 1)	Max load (daN) *	Deflection (mm) **	Package (pcs)

CYLINDRICAL ANTI-VIBRATION MOUNT

male - female

AF260

STANDARD

DIN 95363/B

MATERIAL - SURFACE TREATMENT

Body: NR (Natural rubber)
Pin: Cl 4.8 (Steel) white galvanized
Washer: DD11 (Steel) white galvanized
Bushing: Cl 4 (Steel) white galvanized

COLOUR

NE Black

RUBBER HARDNESS60 Shore A (± 5)**OPERATING TEMPERATURE**

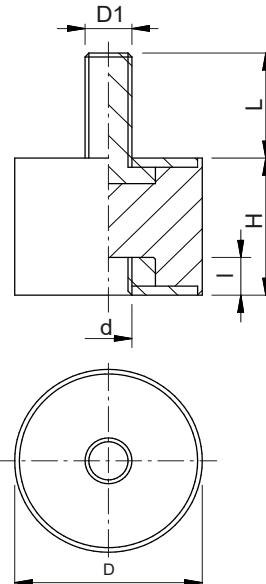

-50°C ÷ 80°C

NOTES

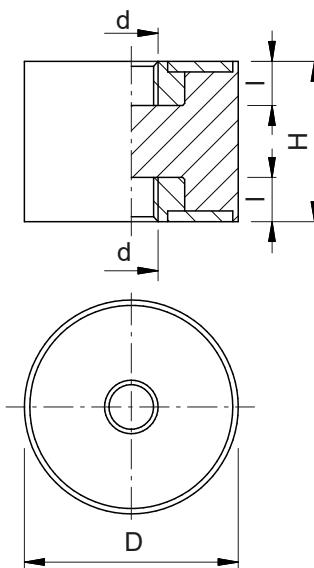

* Indicates the maximum load that can be supported before its functionality is compromised. The load must be compressive - avoid applying traction.

** Indicates the height variation of the rubber under maximum load.

Available in other materials, hardnesses, dimensions, and colours.

MATERIAL - SURFACE TREATMENT

Body: NR (Natural rubber)
Bell: AC (Steel) white galvanized
Base: AC (Steel) white galvanized

COLOUR

NE Black

RUBBER HARDNESS

60 Shore A (± 5)

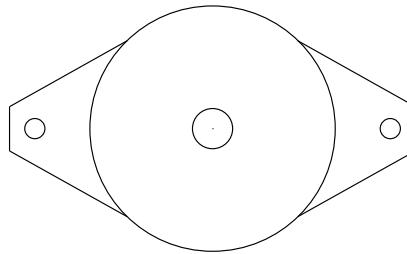

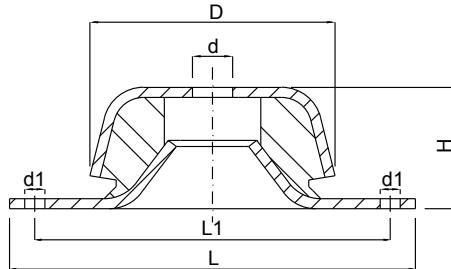

OPERATING TEMPERATURE

-50°C ÷ 80°C

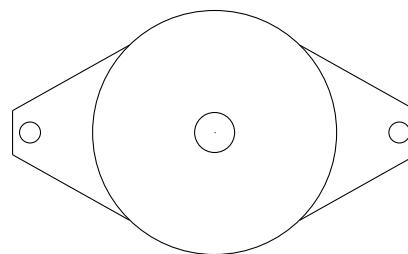

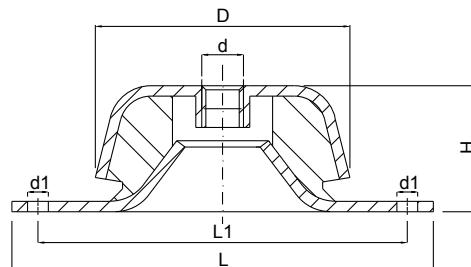

NOTES

* Indicates the maximum load that can be supported before its functionality is compromised. The load must be compressive - avoid applying traction.

Available in other materials, hardnesses, dimensions, and colours.

MATERIAL
PA6.6 (Polyamide)

COLOUR
 Black

SELF-EXTINGUISHING
UL 94 V-2

USE
Particularly suited in applications where the rivet needs to be removed.

	Code  NE	D	S	H	L	Panel hole	Panel thickness	Package (pcs)

MATERIAL - SURFACE TREATMENT

Spring Steel galvanized
AISI302 (Stainless steel) passivated
AISI316 (Stainless steel) passivated

NOTES

- End coils closed and ground.
- * The flexural load indicated in the table refers to the version in galvanized spring steel.
- The load for the versions in AISI302 and AISI316 is 83.3% of that value.
- ** Minimum order 5 pcs.

**MATERIAL - SURFACE TREATMENT**

Spring Steel galvanized

AISI302 (Stainless steel) passivated

AISI316 (Stainless steel) passivated

NOTES

End coils closed and ground.

* The flexural load indicated in the table refers to the version in galvanized spring steel.

The load for the versions in AISI302 and AISI316 is 83.3% of that value.

** Minimum order 5 pcs.

**MATERIAL - SURFACE TREATMENT**

Spring Steel galvanized
AISI302 (Stainless steel) passivated
AISI316 (Stainless steel) passivated

NOTES

- Loops at random position.
- * The flexural load indicated in the table refers to the version in galvanized spring steel.
- The load for the versions in AISI302 and AISI316 is 83.3% of that value.
- ** Minimum order 5 pcs.

MATERIAL - SURFACE TREATMENT

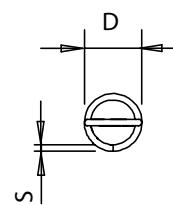

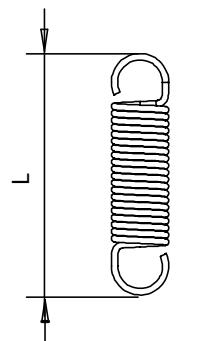

Spring Steel galvanized

AISI302 (Stainless steel) passivated

AISI316 (Stainless steel) passivated

NOTES

* The max torque indicated in the table refers to the version in galvanized spring steel.

The torque for the versions in AISI302 and AISI316 is 93.3% of that value.

** Minimum order 5 pcs.

Different types of loops and hooks are available for constant length extension springs:

Phase 1

Bend the spring 180 degrees at the desired length and cut the wire.

Phase 2

Where the wire has been cut, bend the last coil away 45 degrees. For a double loop, bend the last two coils 45 degrees. Do not use heat to help bend the wire.

Phase 3

Bend the cut end of the loop into the center of the body. This could require pliers. It might be necessary to bend the loop beyond the center of the body, to allow it to bend backwards.

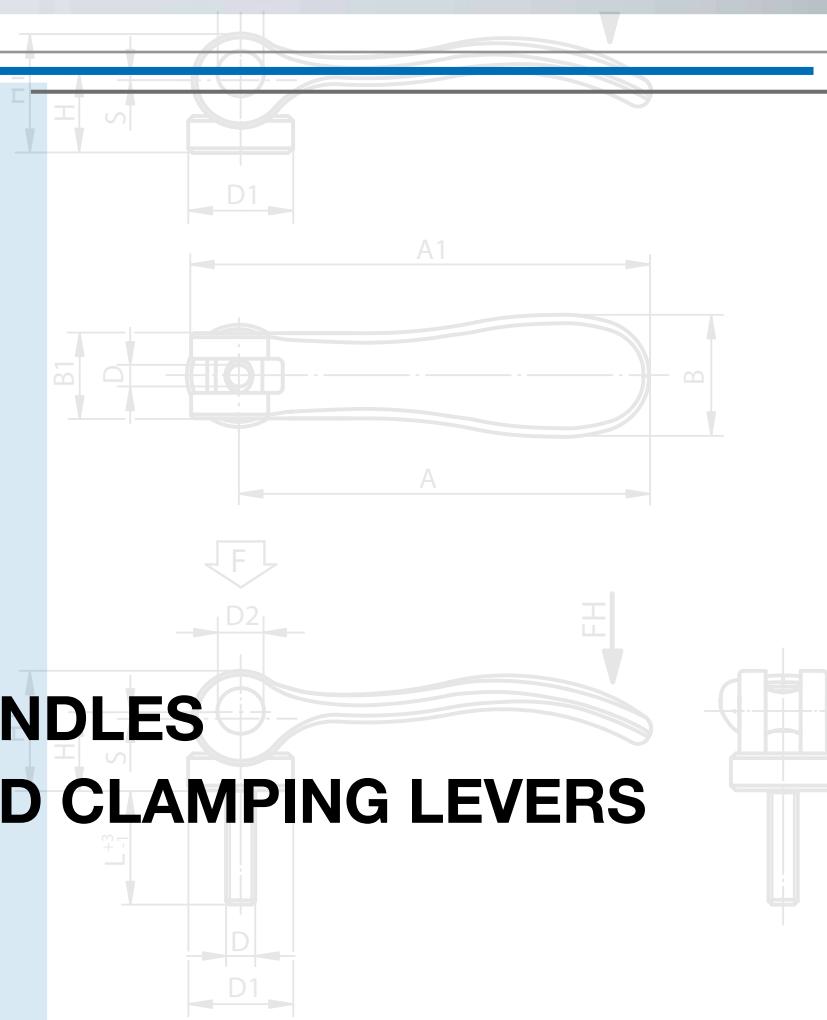

Phase 4

Cut the end of the loop to create the space needed for assembly of the spring.

Cover cup support:	TMP (Thermoplastic) black
	TMP (Thermoplastic) light grey
Cover cup grip:	TMP (Thermoplastic) black

NOTES

Tubular handles are supplied unassembled with a grip (including two caps), two supports (including one cap each), and a grub screw ISO 4766-14H.

For the recommended maximum spacing, consult the table item A Max.

For high handle lengths or stress, other mounting supports can be inserted, supplied unassembled and to be ordered separately.

Long-Lok,
the most advanced
thread locking
method

Long-Lok gives you the following advantages:

1. Vibration resistance

The integrated Long-Lok thread lock secures spring plungers efficiently.
No loosening or falling out after impacts, knocks or vibrations.

2. Extremely high loosening torque

The resilient nylon insert is squeezed like a wedge between the thread of the spring plunger and the fastening component.
By means of the nylon locking system, the thread backlash is shifted to one side, which in turn causes surface pressure at the thread flanks.
The resulting loosening torque is higher than that achieved with most conventional, mechanical methods.

3. Secure in every position

Long-Lok requires neither initial tension nor any defined position.
This is ideal for the positioning of the spring plungers.

4. Saves assembly time and storage space

Long-Lok is integrated into the spring plungers. There are no additional components. No circlips, no spring washers, no locking nuts.
As a result, assembly and stocking costs are reduced considerably.

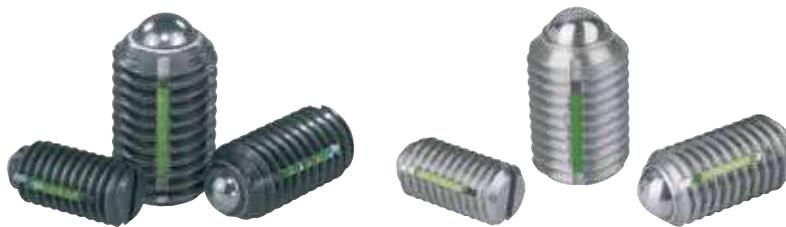

5. For repeated use

When using the Long-Lok the first time, it requires a slightly higher tightening torque.
After third or fourth use, the last reached value remains nearly constant.

6. Ideal solution, from M3 to M16

Light-weight or heavy-weight: name your requirements! We will supply you with the suitable spring plungers with integrated Long-Lok thread lock.

Steel
MATERIAL - SURFACE TREATMENT

Body: 11SMnPb30 (Steel) white galvanized
Indexing pin: AISI303 (Stainless steel)
Grip: TMP (Thermoplastic) blackish grey

Stainless steel
MATERIAL - SURFACE TREATMENT

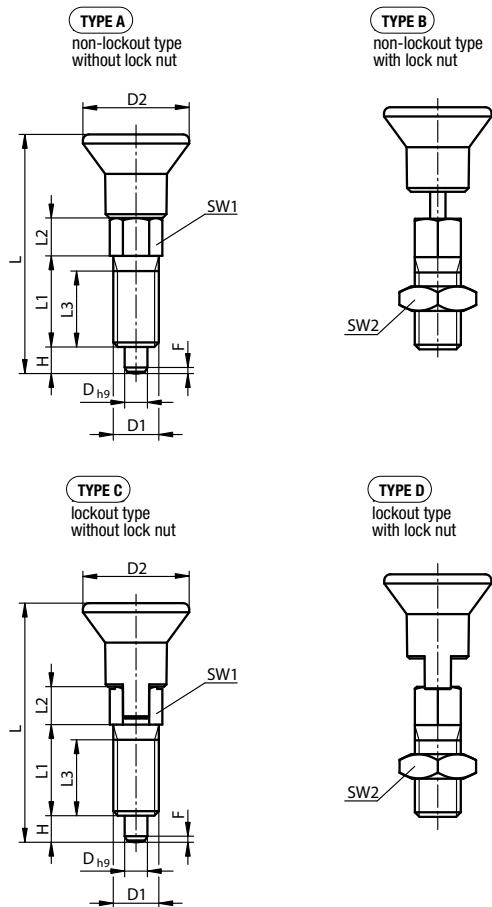

Body: AISI303 (Stainless steel)
Indexing pin: AISI303 (Stainless steel)
Grip: TMP (Thermoplastic) blackish grey

NOTES

This affordable indexing plunger is ideal for applications that do not require extreme precision. Do not exceed the maximum torque indicated below during assembly. Special executions, fine thread available.

Steel, untempered indexing pin

Tempered steel

MATERIAL - SURFACE TREATMENT

Body: CI 5.8 (Steel) burnished

Indexing pin: CI 5.8 (Steel)

tempered, ground, burnished

Grip: TMP (Thermoplastic) blackish grey

Tempered stainless steel

MATERIAL - SURFACE TREATMENT

Body: AISI303 (Stainless steel)

Indexing pin: AISI420 (Stainless steel) tempered, ground

Grip: TMP (Thermoplastic) blackish grey

Untempered stainless steel

MATERIAL - SURFACE TREATMENT

Body: AISI303 (Stainless steel)

Indexing pin: AISI303 (Stainless steel) ground

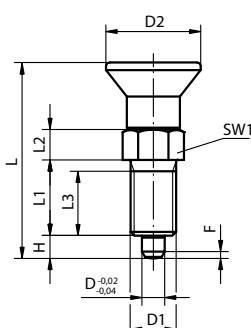

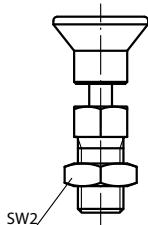

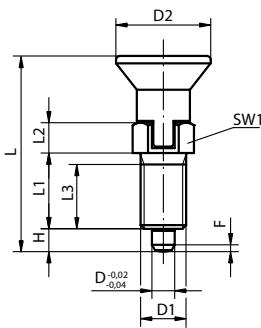

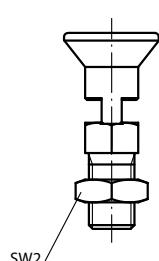

Grip: TMP (Thermoplastic) blackish grey

NOTES

Indexing plungers are used to prevent any change in locking position due to lateral forces. A new locking position can only be set after the plunger has been manually disengaged. If the plunger has to stay disengaged, and to prevent the pin from unlocking, we recommend using from C/D.

MATERIAL - SURFACE TREATMENT

Body: 11SMnPb30 (Steel) burnished
Indexing pin: Cl 5.8 (Steel)
tempered, ground and burnished
Grip: TMP (Thermoplastic) blackish grey
Lock marking: AL (Aluminium) red anodized

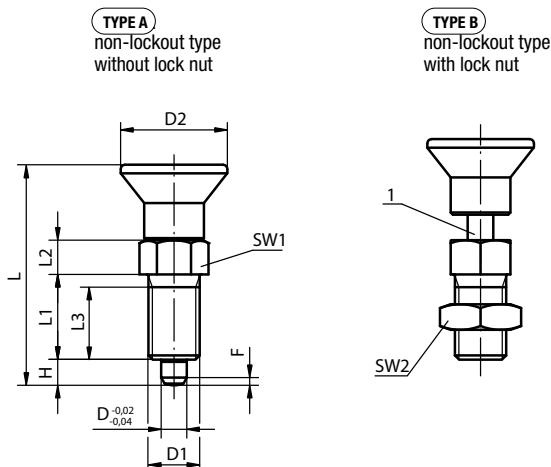

NOTES

When the lock mark is visible the plunger is either completely disengaged or only partly in the index position.

1) Marking ring.

**MATERIAL - SURFACE TREATMENT**

Body: CI 5.8 (Steel) burnished
Indexing pin: CI 5.8 (Steel) tempered, ground
Grip: Black powder coating

NOTES

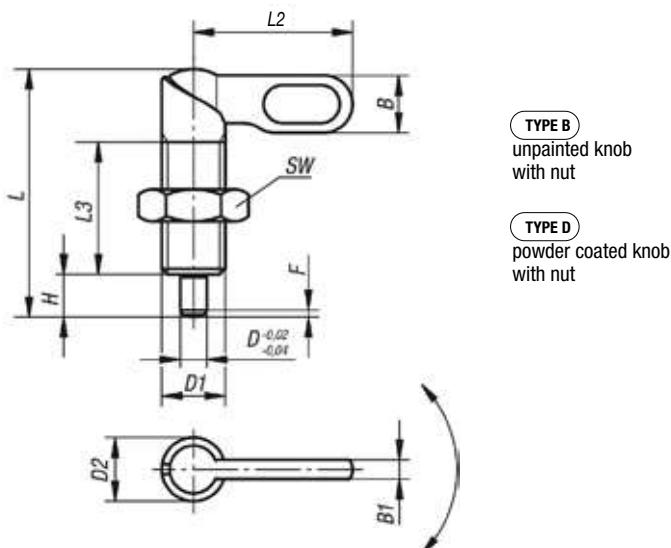

Cam action indexing plungers are used when the indexing pin must not project all the time. Turning the handle 180° retracts the pin, and a notch ensures that the handle remains in position.

	KP03653312050	33	12	14,5	19	50	10	24	12	86	1

MATERIAL

Pin: AISI303 (Stainless steel)
Grip: AISI303 (Stainless steel)
Balls: AISI440C (Stainless steel)
Springs: AISI301 (Stainless steel)

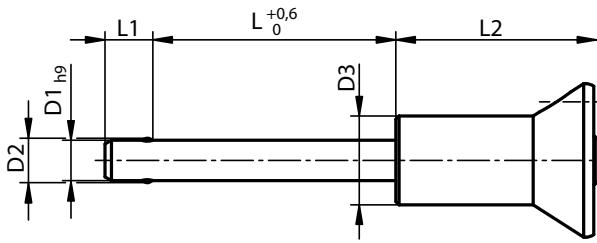

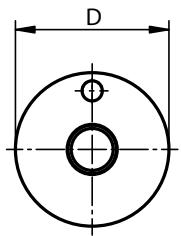

NOTES

Ball lock pins are used to easily fasten or join components. The two balls are disengaged by pressing the push button, and the pin can be slipped into holes in the workpieces. When the push button is released, the balls lock the connection securely.

Double shear stress (F) = $S \cdot \tau aB$ max.

MATERIAL

Pin: AISI303 (Stainless steel)
Button: AISI303 (Stainless steel)
Balls: AISI440C (Stainless steel)
Springs: AISI301 (Stainless steel)
Grip: TMP (Thermoplastic) black

NOTES

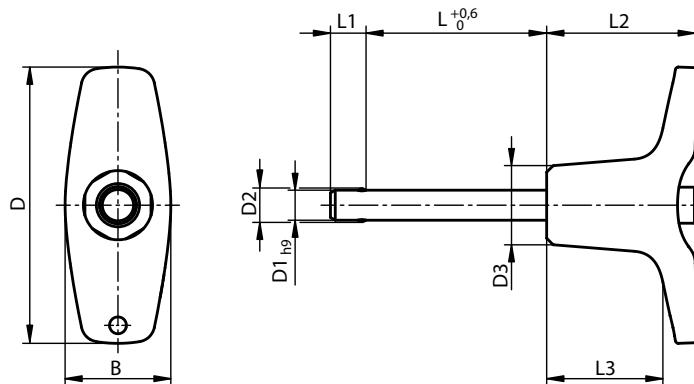

Ball lock pins are used to easily fasten or join components. The two balls are disengaged by pressing the push button, and the pin can be slipped into holes in the workpieces. When the push button is released, the balls lock the connection securely.

Double shear stress (F) = $S \cdot \tau aB \max$

Also available with Red RAL 3020 grip.

**MATERIAL**

Pin: AISI630 (Stainless steel) tempered
Button: EN-AW 2024 T4 (Aluminium) anodized blue
Balls: AISI440C (Stainless steel) tempered and passivated
Springs: AISI301(Stainless steel) tempered
Grip: EN-AC-46000 (Aluminium)
 die-cast, anodized black

NOTES

Ball lock pins are used to easily fasten or join components. The two balls are disengaged by pressing the push button, and the pin can be slipped into holes in the workpieces. When the push button is released, the balls lock the connection securely. The hardened, high-tensile stainless steel pin permits extreme loads with low wear.

Double shear stress (F) = $S \cdot \tau aB$ max

**MATERIAL**

Pin: AISI630 (Stainless steel) tempered
Button: EN-AW 2024 T4 (Aluminium) anodized blue
Balls: AISI440C (Stainless steel) tempered and passivated
Springs: AISI301 (Stainless steel) tempered
Grip: EN-AC-46000 (Aluminium)
 die-cast, anodized black

NOTES

Ball lock pins are used to easily fasten or join components. The two balls are disengaged by pressing the push button, and the pin can be slipped into holes in the workpieces. When the push button is released, the balls lock the connection securely. The hardened, high-tensile stainless steel pin permits extreme loads with low wear.

Double shear stress (F) = $S \cdot \tau aB$ max

**MATERIAL**

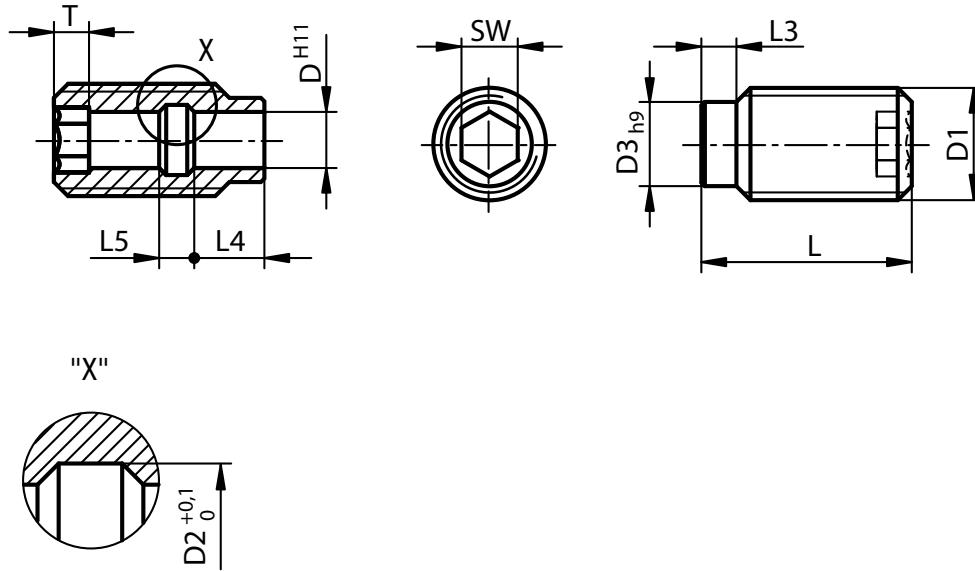

AISI303 (Stainless steel)

NOTES

These bushes are ideal for easy and quick positioning of ball lock pins and locking pins.

Advantages:

- centred by the centring collar.
- easy and reliable installation.
- can be screwed into various materials.
- usable both sides

MATERIAL

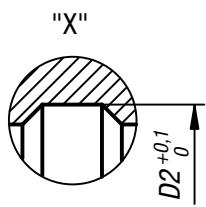

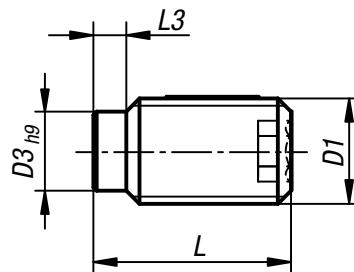

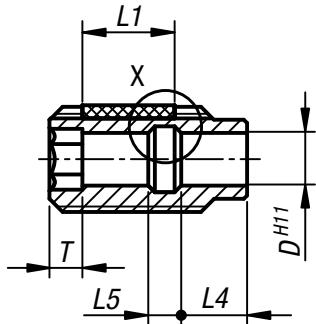

Body: AISI303 (Stainless steel)
Long-Lok insert: PA (Polyamide)

NOTES

These bushes are ideal for easy and quick positioning of ball lock pins and locking pins.

Advantages:

- centred by the centring collar.
- easy and reliable installation.
- can be screwed into various materials.
- usable both sides
- the LongLok thread lock enables the depth to be exactly matched to existing components, no locknut is required.

MATERIAL

Spiral cable: PUR (Rectified polyurethane) black
Eyelet: Rame white galvanized
AISI303 (Stainless steel) polished
Ring: CI 5.8 (Steel) chrome-plated
AISI303 (Stainless steel) polished

NOTES

Elastic spiral cable for mounting device components.
 Excellent recovery force, robust and wear-resistant.

Code	Material rings	L	L1	Package (pcs)
KP036710100	CI 5.8 chrome-plated	100	500	1
KP036710200	CI 5.8 chrome-plated	200	1000	1
KP036720100	AISI303 polished	100	500	1
KP036720200	AISI303 polished	200	1000	1

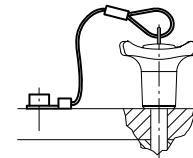

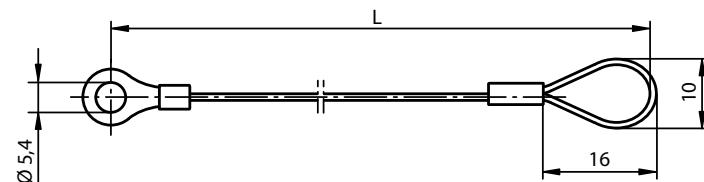

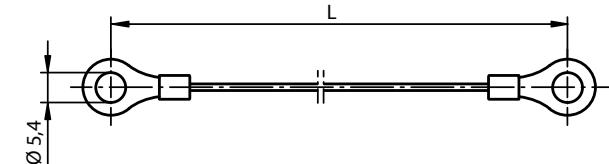

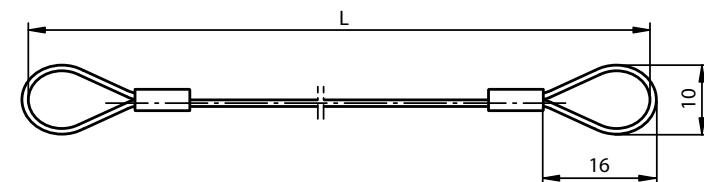

**MATERIAL**

Cable: AISI303 (Stainless steel) plastic coated
Clamp: AL (Aluminium)
Cable tip: AL (Aluminium)

NOTES

With the retaining cable and KP0367 ring, it is possible to attach ball lock pins KP0363, KP0364, KP0641, KP0366, KP0642, KP0790, KP0791 and mounting pins KP0365, so they cannot be lost.

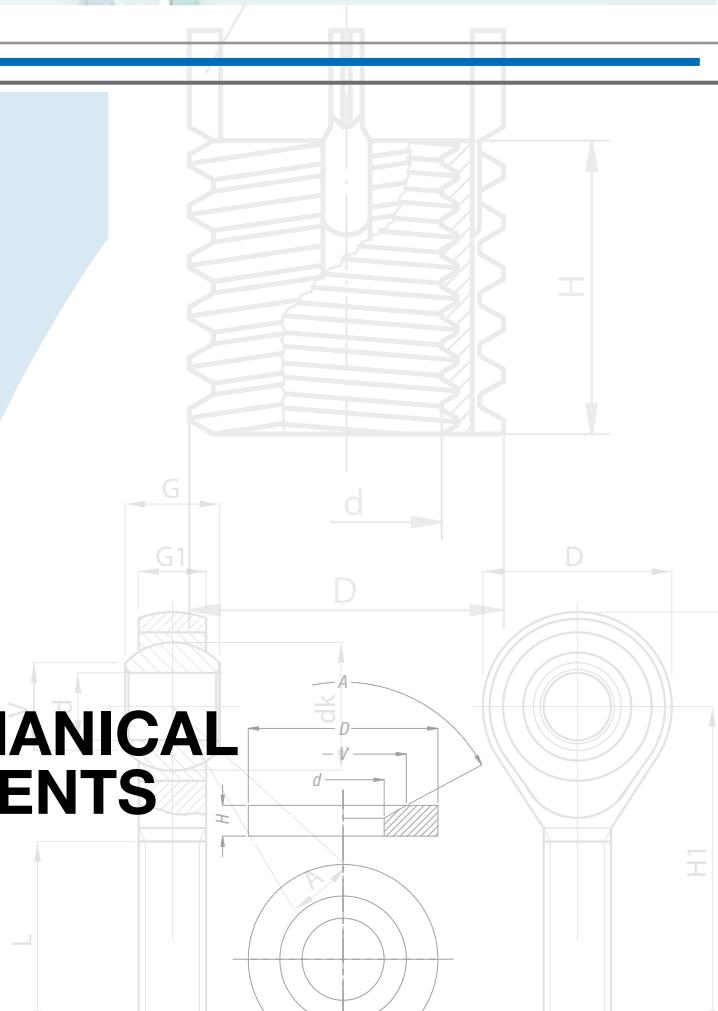

To attach the locking cable use an M5 screw. Operating temperature: +80 °C.

STANDARD
DIN 6319/C

MATERIAL - SURFACE TREATMENT
AC (Steel) HV10 phosphated
AC (Steel) HV10 galvanized white

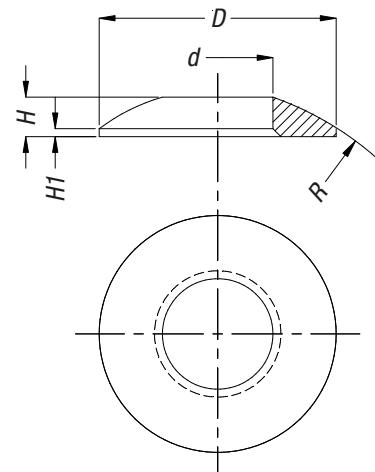

USE

Using the convex washer along with the concave one allows clamping between two surfaces that are not parallel.

ACCESSORIES

Can be assembled with concave washer DIN 6319/D or DIN 6319/G.

STANDARD
DIN 6319/G

MATERIAL - SURFACE TREATMENT
AC (Steel) HV30 phosphated
AC (Steel) HV30 white galvanized

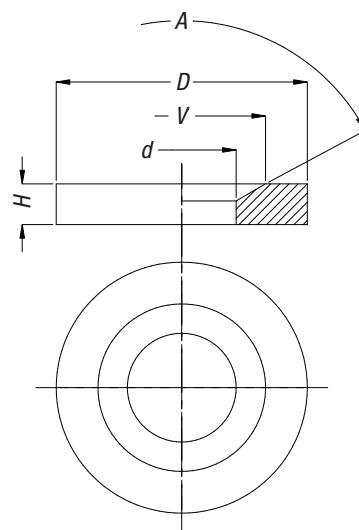

USE

Using the convex washer along with the concave one allows clamping between two surfaces that are not parallel.

ACCESSORIES

Can be assembled with convex washer DIN 6319/C.

MATERIAL - SURFACE TREATMENT

T-slot nut: Zinc plated steel

Ball: Stainless steel

NOTES

T-slot nut is inserted into the slot of the profile from the top, the bottom or by rotation. The spring ball allows the dowel to stay in place.

Assembly instructions

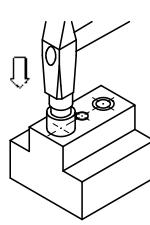

1. Drill and countersink the hole to be tapped or the old thread (82° - 100°)

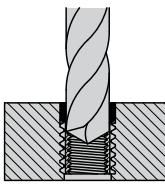

2. Create the required thread with a standard male threader.

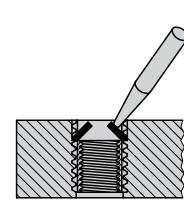

3. Screw in the insert to just below the surface (0,3 - 0,7 mm)

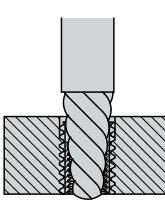

4. Insert the wedges with the assembly tool using a light tap with a hammer.

Dismantling instructions

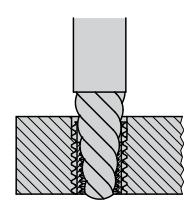

1. Drill the material between the wedges and the internal thread up to the indicated depth.

2. Bend the wedges towards the inside and break them off.

3. Remove the old insert with the screw extractor.

4. Place the new insert in the original threaded hole.

MATERIAL

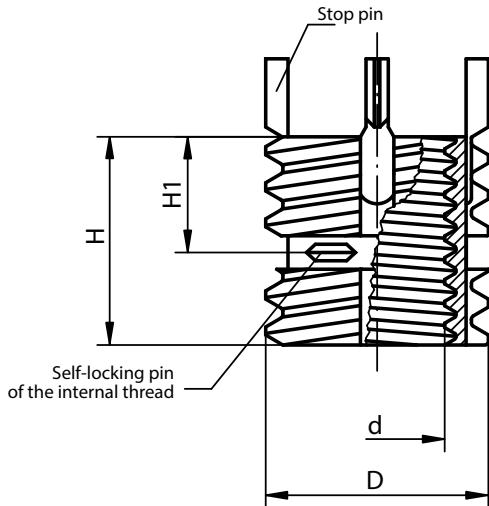

AISI303 (Stainless steel)

USE

Suitable for use with various materials (even heavy metals and castings) for reuse and/or repair of damaged, lacerated, and seized threaded holes, also allowing the recovery of valuable products.

MATERIAL - SURFACE TREATMENT

Body: (d<14) 11SMnPb30 (Steel) white galvanized
(d>12) C40 (Steel) galvanized white
Sphere: 100Cr6 (Steel) lubricated rectified tempered
Bushing: Self-lubricating sintered bronze

**COUPLING**

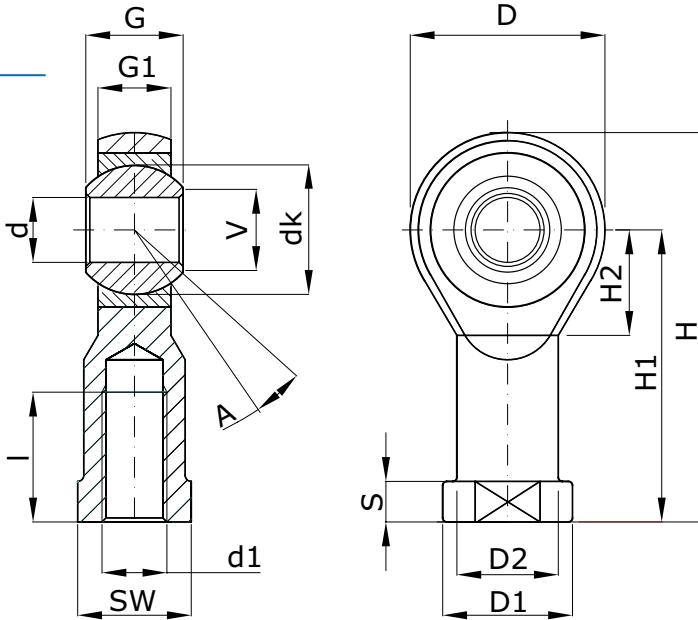

Self-lubricating Steel-Bronze

USE

Precision mechanics, high speed.

MATERIAL - SURFACE TREATMENT

Body: AISI304 (Stainless steel)
Sphere: AISI420 (Stainless steel)
Bushing: Self-lubricating sintered bronze

COUPLING

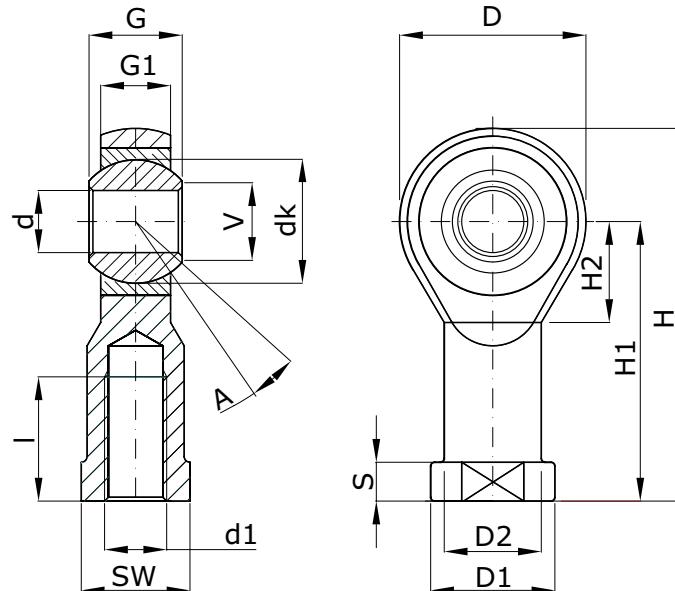

Self-lubricating Stainless Steel-Bronze

USE

Precision mechanics, exposure to oxidizing/corrosive atmosphere.

NOTES

**MATERIAL - FINISH**

GR80 (Steel) powder coated red RAL 3000

ADJUSTABILITY

360° rotation with self-aligning ring that tilts to 180°

SAFETY FACTOR

4:1

OPERATING TEMPERATURE

-40°C ÷ 200°C

CERTIFICATION

CE marking according to the Machinery Directive 2006/42/EC

GS-OA 15-04 - EN1677

DGUV certification

TEST

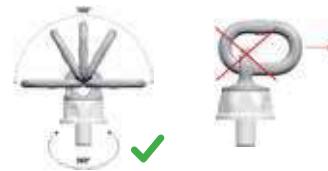

Magnaflux 100%

Load 100%

20.000 work cycles

USE

Assembled with spheres and particularly suited to facilitate adjustment and tilting of the load.

**Warning:**

the device is not suited to continuous rotary movement with a full load.

NOTES

All eyebolts are marked with the operating load, the thread measurement, the steel grade, CE, and the batch tracing code.

Available with other threading and shaft length.

**MATERIAL - FINISH**

Body: GR100 (Steel) powder coated red RAL 3022
Screw: CI 10.9 Burnished (steel)

ADJUSTABILITY

Rotation at 360°

SAFETY FACTOR

4:1

OPERATING TEMPERATURE

-40°C ÷ 200°C

CERTIFICATION

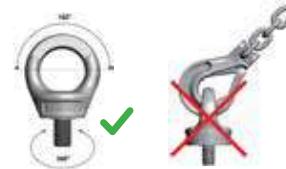

CE marking according to the Machinery Directive 2006/42/EC
GS-OA 15-04 - EN1677
DGUV certification

TEST

Magnaflux 100%
Load 100%
20.000 work cycles

USE

Its properties allow self-alignment toward the angle of rope/chain pulling, ensuring much safer lifting than classic DIN eye bolts.

**Warning:**

the device is not suited to rotation with a full load.

NOTES

All eyebolts are marked with the operating load, the thread measurement, the steel grade, CE, and the batch tracing code.

Available with other threading and shaft length.

See table (European standards)

SAFETY FACTOR

7:1

CERTIFICATION

CE marking according to the Machinery Directive 89/392 CEE II A

USE

The strap must be used on flat surfaces. In fact, it could become damaged with excessive curvature (example: conventional grills and hooks, etc.).

An optimal contact surface can be calculated as follows:
radius of curvature $\geq 0.75 \times$ strap width.

NOTES

All straps have a label sewn inside the slot indicating the length, capacity in various work positions, and marking.
Available in other lengths.

STANDARD
EN 1492-1

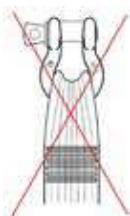

MATERIAL
PES (Polyester)

COLOUR
See table (European standards)

SAFETY FACTOR
7:1

CERTIFICATION
CE marking according to the Machinery Directive 89/392 CEE II A

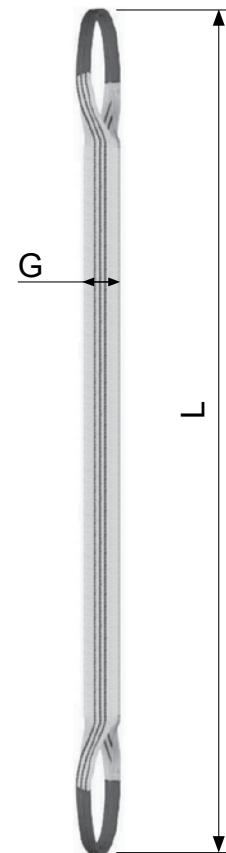

USE

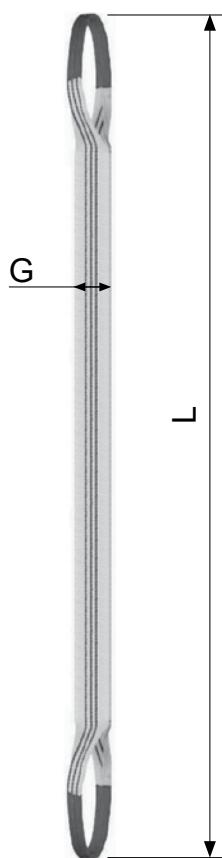

The strap must be used on flat surfaces. In fact, it could become damaged with excessive curvature (example: conventional grills and hooks, etc.).
An optimal contact surface can be calculated as follows:
radius of curvature $\geq 0.75 \times$ strap width.

NOTES

All straps have a label sewn inside the slot indicating the length, capacity in various work positions, and marking.
Available in other lengths.

SAFETY FACTOR

7:1

CERTIFICATION

CE marking according to the Machinery Directive 89/392 CEE II A

USE

Particularly suitable for slip ring (loop) lifting. Reduced wear compared to the flat strap with slots because its entire length can be used.

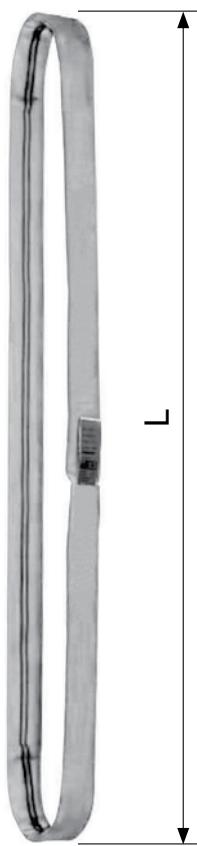

NOTES

The fibre is protected with anti-abrasion tubular sheathing. All straps have a label sewn inside the protective sheathing indicating the length, capacity in various work positions, and marking.

Available in other lengths.

**MATERIAL - SURFACE TREATMENT**

Pin: AC (Steel) galvanized white
Base: PA6-CV30% (Glass-filled polyamide)
Slip-guard: NBR (Nitrile rubber) 70 ShA (± 5)

COLOUR

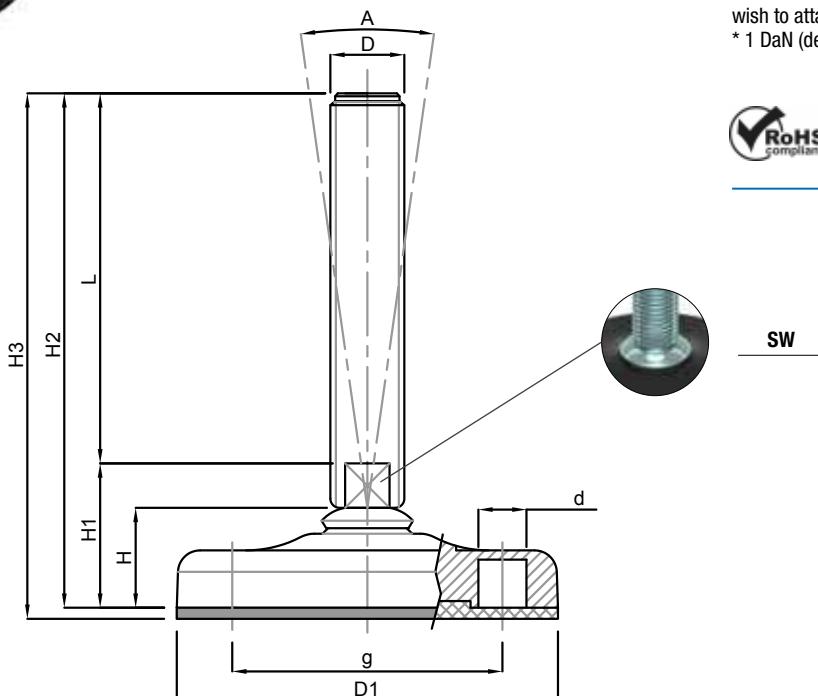

Base:  Black
Slip-guard:  Black

CERTIFICATION

RoHS
REACH

NOTES

Available in other materials, surface treatments, colours.
“D” location always closed buy can be perforated if you
wish to attach the foot base to something.
* 1 DaN (decanewton) = 1.02 Kgf (kilogram-force).

**MATERIAL - SURFACE TREATMENT**

Wheel: PU ring (Polyurethane) 94 ShA (± 2) orange
AL core (Aluminium)
Support: Double crown ball swivel plate AC (Steel)
white galvanized

HUB**WORKING SPEED**

4 Km/h max

OPERATING TEMPERATURE

-25°C ÷ 60°C

USE

Manual cart for heavy loads; good resistance to wear, impacts, grease, and petroleum products, but keep away from contact with saturated steam, acid, strong bases, ketonic and chlorinated solvents.

**NOTES**

Wheel diameter <125 smooth core.

Wheel diameter >100 corrugated core.

Also available with stainless steel supports.
